This is an authentic Omega Speedmaster acquired at an estate auction. I do not know a lot about this watch so I had it checked out by a watch expert. It is known as the Man on the Moon watch because it was the type worn by the apollo astronauts. The watch works fine. The crystal is excellent without any scratches but there is some wear to the metal along the rim. Just some small nicks and scratches. The omega symbol is on the winding mechanism and on the black face of the watch with the words Omega Speedmaster. Around the watch face on the silver rim it is very faint but the words Tachymetre Base and the numbers 1000 to 60 going clockwise. It is engraved on the back Speedmaster and the strap is stainless steel It is not the original strap and is brand new.
